MARCH HOLIDAY PROGRAMME

Issued on: March 2010

A splendid array of
novelty and Creativity
from Children....

DAY 1 ART LAB

It was truly an unforgettable experience for both the children and teachers. With careful selection, we used premium materials to allow children to work on a series of hands-on activities.

We believe these activities have given students a sense of ownership over their work, not only because they've made something but also because they've invested much of themselves into the process.

It's not just an academic skill. We don't want our children to be little machines. We want them to become people who are self-motivated and independent which is very rare in our modern society.

Be the director, recreate story lines and act them out to make fairytale stories come alive!
Children explored on different expressions and doing facial exercises accompanied with sound effects. These provide children room to discover more about themselves.

While exploring these elements, children can come to new perceptions, insights and knowledge about life. In this way, drama becomes a whole new learning experience that is valuable and relevant.

It may be the same old fairy tales that you thought children were re-enacting. However, because of each child's individuality, they shaped the direction of the drama and so enhanced their sense of ownership of it.

DAY 3
FOOD ART

"Wow, My favourite Cream treat!"

Adding a twist to the story lines...

We are to reveal to you an ANCIENT **butter-making** secret... Get your kids to share with you the secret, a totally fresh new experience with no mess at all.

After all the churning, we gave the children slices of fresh bread with a smear of our creamy butter.

In case you think it's all just fun and play in designing the muffins, the children had to first plan and actualize it. It is a sure confidence booster for children as they create the designs of the muffins.

Last but not least, you will never find an identical muffin. Each is representation of the child's uniqueness. They gain autonomy over what they are doing and eventually saying out loud, "This muffin is specially designed by ME!"

"You can teach a student a lesson for a day; but if you can teach him to learn by creating curiosity, he will continue the learning process as long as he lives."

Clay P. Bedford
